WATER-SAVING COLOURED COVER MATERIAL MADE FROM RECYCLED PLASTICS

Thinking progressively is good - but it's progressive action that makes the difference. As part of our sustainability strategy, we introduced the **revolutionary waterSAVE® dyeing process** in 2020: The yarn, which is made from recycled plastics, is dyed all the way through during the production process.

This has **advantages for the environment** compared to the conventional process, in which the yarn is first produced and then dyed in a further step.

AND THIS IS HOW IT WORKS:

All **waterSAVE®** models are **labelled on the closing strap**, which only becomes visible when opened.

WATERSAVE® IS COLOURFUL!

While initially only black umbrellas could be fitted with this sustainable cover in 2021, **additional colours and many models** have been added since 2022. For example, our popular **ÖkoBrella family** has been converted to **waterSAVE®** cover material.

SUSTAINABLE HANDLES MADE OF RECYCLED ABS – ECO-FRIENDLY AND HIGH-QUALITY

Recycled **Acrylonitrile Butadiene Styrene (rABS)** consists of disposed ABS products that are processed into new high-quality products – **recycling in top form.**

rABS retains the strength, durability and impact resistance of the original material, while **significantly reducing the carbon footprint** by giving the raw material a second life. The aesthetic appearance can be seen, for example, in the handles of our **new Windfighter® models.**

* Calculated based on water savings of 2 million litres of water for processing around 300,000 m² of fabric, from which around 350,000 umbrellas can be produced.
